Sourcecode. This is an exposition of

Newman's diamond lemma, with (an outline of a) constructive proof and a few applications (including a glimpse at Gröbner bases). Darij Grinberg - Algebra notes - In mathematics, division by zero is division where the divisor (denominator) is zero. Such a division can be formally expressed as $a / 0$ where a is the dividend (numerator). In ordinary arithmetic, the expression has no meaning, as there is no number which, when multiplied by 0, gives a (assuming $a \neq 0$), and so division by zero is undefined. Since any number multiplied by zero is zero, the ... Division by zero - Wikipedia -
