Google + Wed, 05 Dec 2018 06:51:00 GMT Neets Module 10-Introduction to Wave Propagation ... - Wave propagation is any of the ways in which waves travel.. With respect to the direction of the oscillation relative to the propagation direction, we can distinguish between longitudinal wave and transverse waves.. For electromagnetic waves, propagation may occur in a vacuum as well as in a material medium. Other wave types cannot propagate through a vacuum and need a transmission medium to ... When passing through a material medium, they are slowed

according to that object's permeability and permittivity. Air is thin enough that in the Earth's atmosphere radio waves travel very close to the speed of light.
